FOR IMMEDIATE RELEASE

**CECO INTRODUCES THE WORLD'S FIRST LONG-LASTING STAINLESS STEEL
DEACTIVATOR FOR HIGH-SPEED COMPRESSORS**

Eliminate Broken and Bent Fingers – Less Maintenance, Less Downtime!

HOUSTON, AUG. 15 -- CECO (Compressor Engineering Corporation) announced today that its engineers have solved the problem inherent in "finger-style" deactivators.

CECO's DUR-FLEX® is the world's first long-lasting, low maintenance deactivator that can be used in valves requiring finger-style unloaders and operating up to 1,000 rpm.

"This is an exciting development for anyone working with high speed compressors," said Bruce Hotze, Chief Executive Officer of CECO. "Our new finger-style unloader compensates for varying pressure on the valve elements and is more robust and reliable than similar products on the market today."

The DUR-FLEX® design allows for the deactivation of valves without damaging them, and does it in a timely, efficient manner. This is accomplished with a unique patent pending self-dampening finger style construction that eliminates the breakage of fingers or valve sealing elements. The CECO DUR-FLEX deactivator unloads existing valves with excellent results.

Features and Benefits of the new DUR-FLEX FINGER UNLOADER:

Features	Benefits
----------	----------

Patent pending dampening system	Eliminates breakage of fingers and valve elements
Stainless Steel Fingers	Strong, Non-Corrosive
Custom Engineered and Manufactured	Meets your exact specifications and needs
Adjustable Finger Travel	Compensates for valve wear and thickness modifications associated with valve overhauls
Unique Finger Construction	Eliminates fractures of individual fingers

About CECO

CECO is the world's largest independent manufacturer of compressor and engine replacement parts serving industries throughout the world and specializing in products for natural gas transmission, gas processing and gathering and petrochemical producers.

CECO® and DUR-FLEX®, are registered trademarks and/or registered service marks of Compressor Engineering Corporation in the United States.
