**CECO Offers Free Training for Compressor Valve Repair**

HOUSTON, TEXAS. MARCH 31, 2003 – Compressor Engineering Corporation, CECO announces today that its Compressor Valve School once held for selected clients, will now be offered to the public free of charge.

The Compressor Valve Repair School is held at CECO's headquarters in Houston, Texas. Over 200 compressor mechanics have attended the course to learn the latest techniques and specifications required for proper valve maintenance.

“The Free Compressor Valve School has grown to include much more than channel valves,” says Don Smith, Domestic Sales Manager. “Today, we also cover the repair processes needed to maximize performance on the unloaders, regulators and packing cases used in reciprocating compressors.”

Interested parties should call 800-879-2326 or visit the CECO website at [www.ceconet.com](http://www.ceconet.com) for more information on the school.

Compressor Engineering Corporation (CECO), headquartered in Houston, Texas, was founded in 1964 and has grown to become the world's largest independent manufacturer of compressor and engine replacement parts. In 1977, CECO opened its New Orleans warehouse and sales office, and in 1980 added a sales office, warehouse, and repair center and in Odessa, Texas, which expanded again in 2002. Precision Repair - Baton Rouge was launched in 2003. Custom engineered components and repair are only a portion of CECO's solution packages. They also provide customized software solutions, testing, training and consulting.
